

Proven Performance and Seamless Fertilizer Compatibility, Now With Extended Shelf Life and Better Pourability

AZteroid[®] Pro is an improved azoxystrobin formulation from Vive, designed to deliver proven, long-lasting control of soil-borne diseases while improving ease of handling and application for growers and applicators. Designed for both in-furrow and foliar use, it maintains the proven performance, tank-mix compatibility, active ingredient loading, and use rates of AZteroid FC 3.3, with added benefits like extended shelf life and improved pourability after long-term storage. By combining reliable disease control with improved usability, AZteroid Pro supports uniform emergence, stronger stands, and enhanced plant vigor, making it a practical, dependable solution for real-world farming conditions.

THE AZTEROID[®] PRO DIFFERENCE:

- The same reliable mixability, active ingredient loading, use rates, and proven disease protection of AZteroid FC^{3.3}
- Improved shelf life stability and better pourability after long-term storage compared to AZteroid FC^{3.3} and competitors
- Delivers long-lasting soil-borne disease control
- Supports strong early-season stands, plant vigor, and uniform emergence
- Compatible with liquid fertilizers, micronutrients, and other crop inputs, even in ultra-low water volumes
- Mixes smoothly without any clumping and clogging issues, especially when compared to competitors
- Enables easy, effective in-furrow or foliar applications while saving time and resources with single-pass efficiency
- Provides growers peace of mind that the active is making it to the field and not being wasted in the jug or tank

CATEGORY	Fungicide
CONTAINS	Azoxystrobin (3.3 lbs/gal)
GROUP	11
APPLICATION	Soil Or Foliar
COMPARE TO	Acadia [™] LFC, Quadris [®]
PACKAGE SIZE	2 X 2.5 Gal

DON'T WASTE PRODUCT IN THE JUG

AZteroid® Pro Improved Pourability vs Acadia™ LFC

Acadia™ LFC

AZteroid® Pro

With AZteroid® Pro, just a simple “farmer shake” delivers smooth flow, minimal residue, and an easy rinse-out. Acadia™ LFC shows heavy clumping and hard packing, leaving 42% of product in the jug and delivering only 7% AI (vs. 18.4% on label). *AZteroid® Pro was tested after 24 months of shelf life. Acadia LFC was tested after 7 months of shelf life.*

BETTER MIXING IN ULTRA-LOW WATER VOLUMES

AZteroid® Pro + Mustang® Maxx
(After 5 hours at 1.5 and 3 GPA)

1.5 GPA

3 GPA

50 MESH

100 MESH

1.5 GPA

3 GPA

AZteroid® Pro + Mustang® Maxx

AZteroid® Pro is highly compatible with other crop inputs, like Mustang® Maxx, even at ultra-low water volumes. It maintains a uniform, stable mixture for up to 5 hours in an agitated tank, giving applicators greater flexibility and confidence that the solution will stay evenly mixed from start to finish.

RATE COMPARISON CHART

FUNGICIDES	AI (lb/gal)	For Approximate Calculations	Application Rate (fl oz/A)
 AZteroid® Pro	3.3 lb/gal	Divide by 1.59	<i>Quadris @ 9 fl oz/ac = AZteroid Pro @ 5.7 fl oz/ac</i>
<i>Aframe® / Quadris®</i>	2.08 lb/gal		
<i>Acadia™ LFC</i>	1.65 lb/gal	Divide by 2	<i>Acadia LFC @ 10 fl oz/ac = AZteroid Pro @ 5 fl oz/ac</i>

CROP USE RATES *

Crop	Rate/Ac	Crop	Rate/Ac
Corn	In-Furrow: 4.2 – 8.4 fl oz/ac	Soybeans	In-Furrow: 4.2 fl oz/ac
	2x2: 8.4 fl oz/ac		Foliar: 6 fl oz/ac
Potatoes	3.3 – 5 fl oz/ac	Sugarbeets	5.7 – 9.4 fl oz/ac

**See label for specific use rates, crop registrations, and groups. Rates are row-width dependent. Not all products are registered in all states.*

BOTTOM LINE

AZteroid® Pro builds on the proven performance of AZteroid FC^{3.3} with an improved formulation designed for better storage, smoother handling, and easier pourability. The result is a more user-friendly azoxystrobin that helps support early crop establishment while fitting more seamlessly into liquid crop input programs.
